1) Can we add any statement below break or continue statement ?

No!, we cannot add any statement under break or continue statement because error will occur as "Unreachable code".

Example :

```
public class Demo{
    public static void main(String[] args) {

        for(int i=0;i<6;i++) {
            break;
            System.out.println("my name"); //error: Unreachable
code      }
        }
    }
```

2) what will be output of the following code

```
a) public class Demo {
    public static void main(String[] args) {
        for(int i=0;;i++)
        {
            System.out.println("KODNEST");
        }
    }
}
```

output :
KODNEST
KODNESt
KODNESt

·
·
·
·
·
·
·

Infinite times

=====

b)

```
b) public class Demo {  
    public static void main(String[] args) {  
        for(int i=0;;i++)  
        {  
            if(i==10)  
            {  
                System.out.println("KODNEST");  
                break;  
            }  
        }  
    }  
}
```

OUTPUT :
KODNEST

=====

C)

```
public class Demo {  
    public static void main(String[] args) {  
        for(int i=0;;i++)  
        {  
            if(i==10)  
            {  
                System.out.println("KODNEST");  
                continue;  
            }  
            break;  
        }  
    }  
}
```

OUTPUT : void

=====

D)

```
public class Demo {  
    public static void main(String[] args) {  
        for(int i=1;i<=5;i++)  
        {  
            System.out.println("Hello");  
            for(;;)  
            {  
                System.out.println("Kodnest");  
            }  
        }  
    }  
}
```

```
break;
}
}
}
}
```

output :

```
Hello
Kodnest
Hello
Kodnest
Hello
Kodnest
Hello
Kodnest
Hello
Kodnest
```

=====

```
E)
    public class Demo {
    public static void main(String[] args) {
    for(;;)
    {
    System.out.println("Hello");
    for(;;)
    {
    System.out.println("Kodnest");
    break;
    }
    System.out.println("Technologies");
    break;
    }
}
```

```
}  
}
```

output :

```
Hello  
Kodnest  
Technologies
```

```
F)  
public class Demo {  
    public static void main(String[] args) {  
        for(;;)  
        {  
            System.out.println("Hello");  
            while(true)  
            {  
                System.out.println("Kodnest");  
                break;  
            }  
            System.out.println("Technologies");  
            break;  
        }  
    }  
}
```

output :

```
Hello  
Kodnest  
Technologies
```

G)

```
) public class Demo {  
public static void main(String[] args) {  
for(;;)  
{  
System.out.println("Hello");  
while(true)  
{  
break;  
System.out.println("Kodnest");  
}  
System.out.println("Technologies");  
break;  
}  
}  
}
```

output :

error unreachable code

=====

H)

```
public class Demo {  
public static void main(String[] args) {  
for(;;)  
{  
System.out.println("Hello");  
while(false)
```

```
{  
System.out.println("Kodnest");  
}  
System.out.println("Technologies");  
break;  
}  
}  
}
```

error unreachable code

=====

```
I)  
) public class Demo {  
public static void main(String[] args) {  
do  
{  
System.out.println("Hello");  
while(true)  
{  
System.out.println("Kodnest");  
break;  
}  
System.out.println("Technologies");  
break;  
}while(true);  
}  
}
```

output :

Hello
Kodnest
Technologies

=====

J)

```
public class Demo {  
    public static void main(String[] args) {  
        do  
        {  
            System.out.println("Hello");  
            for(int i=1;i<=100;i=i+3)  
            {  
                System.out.println("Kodnest");  
                if(i==19)  
                {  
                    break;  
                }  
            }  
            System.out.println("Technologies");  
            break;  
        }while(true);  
    }  
}
```

output :

```
Hello  
Kodnest  
Kodnest  
Kodnest  
Kodnest  
Kodnest  
Kodnest  
Kodnest  
Technologies
```
